

BL Black Tails

Direct harvestable high yielding Black

BLACK BEAN

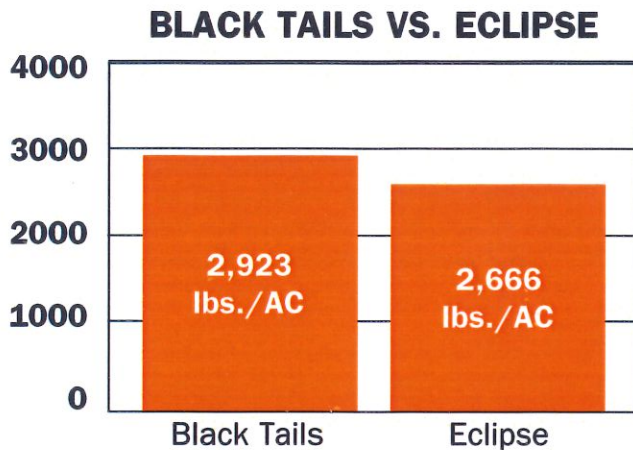

Black Tails—High yielding upright

Profile:

Black Tails is a new black bean variety that has shown good adaptability to North Dakota, Michigan, New York, Manitoba and Ontario production regions.

A consistent performer throughout the trialing process and in commercial production, its upright architecture and excellent yield potential make it an excellent choice for growers needing a slightly earlier variety.

Assuming the 250 lbs./AC* yield increase over Eclipse, profit would increase \$75/AC on \$30/cwt beans. This would amount to \$7,500 increased profit over Eclipse on 100 acres of production.

Data from 2013-2016 trials in Forest River, Hatton, Prosper and Buxon locations.

TRIAL DATA

BLACK TAILS

Approx. Maturity	99-103 days or about 1-2 days later than Eclipse**
Plant Type	2A
Approx. Seed Count	2,405 seeds/lb.; slightly larger than Eclipse***
Disease Resistance	Preliminary testing shows the "I" gene for BCMV and has shown Rust resistance in the Colorado State University screening trial.

* Yield data based on 20 yr./locations of data.

** Maturity data is based on 16 yr./locations of data.

*** Seed count data is based on 20 yr./locations of data.

For customers around the world, ADM draws on its resources—its people, products, and market perspective—to help them meet today's consumer demands and envision tomorrow's needs.
