

Pinto Sinaloa*

High yielding upright

PINTO BEAN

Sinaloa – High yielding upright

Profile:

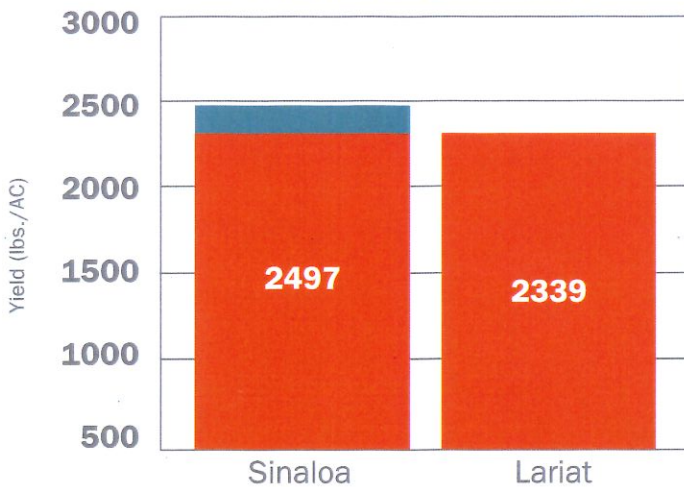

Sinaloa, an AmeriSeed variety distributed by Seedwest, is a high yielding, upright, medium profile variety holding its pods off the ground. Sinaloa has better architecture and seed color than Lariat.

Economic Profile:

Assuming a 150 lbs./AC yield advantage compared to Lariat, profit would increase \$45/AC on \$30/cwt. beans minus the difference in seed cost/acre. This amounts to about \$7,200 increased profit over Lariat on a one quarter section field.

SINALOA vs. LARIAT

Yield Data (33 yr./locations)
 *Mean lbs./AC from 2006-2012 with data from Forest River, Buxton, St. Thomas, Northwood, Hatton, Devil's Lake, Hoople, Pisek, and Prosper. Data not meant to be a guarantee of performance, but rather is report of historical performance.

TRIAL DATA

SINALOA*

Approx. Maturity	3 days earlier than Lariat
Plant Type	2B
Approx. Seed Count	1,280 seeds/lb.
Disease Resistance	IR: UR-3 gene**

* US plant variety protection is approved; unauthorized propagation prohibited.

** See reverse side for disease resistance abbreviation chart.

For customers around the world, ADM draws on its resources—its people, products, and market perspective—to help them meet today's consumer demands and envision tomorrow's needs.
